“ Skilling-up for an AI-powered world involves more than science, technology, engineering and math. **As computers behave more like humans, the social sciences and humanities will become even more important.** Languages, art, history, economics, ethics, philosophy, psychology and human development courses can teach critical, philosophical and ethics-based skills that will be instrumental in the development and management of AI solutions.”

– MICROSOFT PRESIDENT **BRAD SMITH**

“When I started volunteering at UM, I never imagined someday I would get the opportunity to work in one of the greatest museums in the world. This is an absolute dream come true!”

Oct. 17, 2017

Dear ~~Mr. [unclear]~~  
Your daughter, ~~[unclear]~~  
is a student in my  
A&P classes at UM. When  
she and I met in my  
office today she told  
me about you, your diagnosis  
and your prognosis.

As a mother of three  
daughters, I cannot  
imagine the range of  
emotions you are feeling.  
I am sure you must be so proud of ~~[unclear]~~

I do know that I  
would find some  
comfort in knowing  
that my daughters  
would have a wide  
network of supportive  
mentors during a difficult  
time such as this one.  
~~[unclear]~~ clearly has a  
knack for human A&P.  
You have had a profound  
impact on her as  
she described you as  
her hero. If she →

decides to pursue  
medicine, it is because  
of you. If I have the pleasure  
of having her in class  
again, I will do everything  
I can to support her in  
her academic and  
professional pursuits.
