

Fall 2009 Seminar Schedule - Most talks are at 4:10pm unless otherwise noted

Date	Speaker	Institution	Title
Sept. 11	Winston-Thompson Symposium – UM Theater 8-5:30		
Sept. 14	Keynyn Brysse	Princeton University	Impacts and mass extinctions: a beautiful hypothesis impervious to ugly facts
Sept. 21	Jeff Vervoort	Washington State University	Using new chronologic and isotopic tools to unravel the geologic evolution of the Northwest U.S.
Sept. 28	Jane Gilotti – <i>SPECIAL TIME 12:00</i>	University of Iowa	Ultrahigh-pressure metamorphism in the overriding plate of a continental collision, NE Greenland Caledonides
Sept. 28	Bob Anderson	University of Colorado	From glacial polish to valley relief: how glacial sliding and rock type matter in glacial landscape evolution
Oct. 5	Chunmiao Zheng – GSA Birdsall-Dreiss Lecturer	University of Alabama	Will China Run Out of Water?
Oct. 12	Chris Mattinson	Central Washington University	Rates of UHP metamorphic processes from geochronology and trace element analysis, western China
Oct. 19	<i>GSA meeting in Portland – no seminar</i>		
Oct. 26	Sasha Reed	University of Montana College of Forestry	Linking controls over above- and below-ground ecosystem function help elucidate the effects of global change
Nov. 2	Kyle Blasch	USGS Helena	Recharge Mechanisms in a Semi-Arid Environment
Nov. 9	Marjorie Chan – Association of Women Geoscientists Lecturer	University of Utah	Red rocks on Earth and Mars
Nov. 16	Colin Shaw	Montana State University	Using crystallographic fabrics to understand continental tectonics and dinosaur biology
Nov. 23	Jeremy Stalker	University of Montana	Determining the Hydrological Inputs, Including Submarine Groundwater Discharge, to a Subtropical Estuary Using Geochemical Tracers, Celestun, Yucatan, Mexico
Nov. 30	Grad Student Symposium (Harper)		
Dec. 7	Grad Student Symposium (Harper)
