

University of Montana Identity Management
Procedure for Creating NetIDs and Umontana Aliases for

Retirees

December 12, 2007

Retirees are given a UM NetID and Umontana.edu Email Alias based on information that is maintained in the Banner Enterprise Information System. The Retiree NetID is in the format fl123456e. A retiree who is also a student, could have two NetIDs.

NOTE: since they would have already been assigned a NetID and Umontana.edu Alias as an employee, this will result in the continued activation or reactivation of the same NetID and Umontana.edu alias that they had as an Employee.

Retirees are identified in Banner as having an Active Retiree Record (PCBPERS). Only the following Retiree Classes are included in this selection:

- PR – Retiree PERS
- PL – PERS Retiree (labels only)
- RE – Retiree status unknown
- RL – TRS Retiree (labels only)
- SR – Retiree self-pay
- TI – Retiree TIAA-CREF
- TR – Retiree TRS

Human Resource Services maintains Retiree information in Banner.

Retiree UMontana.edu email aliases will be activated once the Retiree identifies a Preferred Email Address in Banner (through Cyberbear). Once this is done the Umontana.edu alias will deliver mail to the identified Preferred Email Address.
