Dear students,

As in past years, regular course waitlisting processes end on the first day of class - today!

- All waitlist notifications are now expired.

- Nobody else can add to a waitlist via CyberBear.

- Anyone who received a waitlist notice and did not register via CyberBear may request a digital Closed Override from their instructor.

- Instructors may enter digital Closed Overrides via CyberBear at their discretion. Due to capacity limits, some requests may not be approved. We encourage you to make a back-up plan if at all possible.

- Be sure to send your UM ID# (790...) to the instructor when you request the override.

- To view your overrides, go to Student Services - Registration - Prepare for Registration. Permit Override will appear with the course information below. This will not appear at all if there are no overrides assigned for the chosen semester.

- Waitlisted classes do not count toward your total credit load until it is marked as a *registered* course.

Remember: If you are currently waitlisted for a course and your instructor grants you a Closed Override, you must still register for the class in CyberBear.

If you need assistance, please contact us by email, phone, or in person on the 6th floor of Aber Hall.

Best wishes for a successful semester!
